_____	Recruitment & Admissions	_____	Student Finance
_____	Student Financial Aid	_____x_____	Student Records

Explanation of Request (Completed by requestor)

```

SELECT A.STRM, A.SUBJECT, A.CATALOG_NBR, A.CLASS_NBR,
A.INSTRUCTION_MODE
FROM PS_CLASS_TBL A, PS_OPR_DEF_TBL_CS B
WHERE B.OPRID = 'rpospisl'
AND ( A.INSTITUTION = B.INSTITUTION
AND A.INSTRUCTION_MODE = 'P' )
ORDER BY 1, 2, 3, 4

```

Purpose of Request (Completed by requestor)

This is a very simple edit that helps make sure that we have not left the default P code in the instruction mode field for any section. When we do, it has a negative impact on 3rd week and other enrollment reporting that looks at enrollment by instruction mode. Having it as a report would allow those people who build and update the schedule of classes to access it easily, as needed.

Explanation of Request (Completed by requestor)

After reviewing the results from the Query NDU_0112_SR-Courses with Fees, we would like to have the fees that calculate PER UNIT added. Currently the fees that show up on the query are all flat rate fees. Some of the schools charge class/course fees per credit which show up as 0.00 on the report.

I would also like to see the course fees that are set up, but are not charging (ex. The “component” has been changed since the fee was set up and now the fee isn’t picked up.)

This was discussed and approved during the October conference call.

Purpose of Request (Completed by requestor)

Based on the current query, it shows that the classes with fees per credit are charging 0.00. The revised query would be more accurate.

We have found that sometimes the component for a class gets changed after we set up the course/class fee which causes the fee not to charge. It would be nice if this report would alert us to those issues.
