Definitions:
With the new system comes new terminology. Here is a short list of PeopleSoft words and definitions so we can all start "talking PeopleSoft."

**Account:** On a Purchase Order or Voucher, an Account serves the same function as a TCC. Accounts are now 6 digits in length instead of 3.

**Program:** Serves the same function in PeopleSoft as Projects did in UCICS.

**Voucher:** Replaces the term RFP (Request for Payment).

Tips
There are some general tips that will help with processing transactions in PeopleSoft.

**Clear Cache:** It is a good idea to clear your cache files about once every week. Cache can be the cause of some strange warning messages, and security issues. To clear cache:

- Open your web browser. Click on Tools, Internet Options…
- The Internet Options page will appear.
- Click on the **Delete Cookies...** button.
- Click on the **Delete Files...** button.
- Click **OK**.
- Your cache files are now clear.
Add to Favorites

Favorites are located on the top of your menu in PeopleSoft. To add a page to your favorites, navigate to the page you wish to add, then click on the Add to Favorites link located at the top right of your PeopleSoft web page. The favorite will be stored in the My Favorites folder at the top of the left hand navigation or menus.

Customize

You can customize your entry screens for more user-friendly entry. When you customize entry pages, it only changes the pages accessed when using your user ID. Each user must customize his or her own pages.

Click on the Customize link where available.

Some fields are not being used by the NDUS system. To hide fields, click on the field, and then select “Hidden”.
You can also change the order of the entry fields. Select one of the fields you want to sort, and click on the move up and move down buttons to create the order you want.

Click on Preview to see your changes.

Click on Restore Defaults to change everything back to the original default settings.

Click on Cancel to go back to the original page without recording any of your changes.

Click on OK to select all of your changes. The changes will be permanently saved when you click Save on the entry page. The next time you access this page, your screen will contain your customizations.

**Hot Keys**

You can generally tab to and activate entry fields, lookups, dropdowns, buttons and checkboxes without using the mouse.

1. **Entry Fields** (Ex: Vendor: ): Tab to entry field and key in the correct value.

2. **Lookups** (Ex: [ ], [ ]): Tab to the lookup and hit ENTER. This brings you to the lookup screen.

3. **Drop-Downs** (Ex: [ NET 15 ]): Tab to the lookup to highlight it. Type the first letter of the value you wish to select. Keep typing the first letter until your value appears. Use the arrow to go back to the previous value. When you have the correct value in the drop-down, tab away from the drop-down box.

4. **Buttons** (Ex: [ + ], [ − ], [ Save ], [ Add ]): tab to the button and hit ENTER to activate the button’s action.

5. **Checkboxes** (Ex. Separate Payment ): tab to the selection. Hit the SPACE BAR to select the checkbox.

For more entry options, you can use Hot Keys instead of using the mouse. Hot keys are listed in the table below.

<table>
<thead>
<tr>
<th>Key Combination</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ALT+1</td>
<td>Saves page in a transaction. Moves to the Search or Add button on a Search or Look Up page. Moves to the OK button on a secondary page.</td>
</tr>
<tr>
<td>ALT+2</td>
<td>Returns to the search page from the transaction page.</td>
</tr>
<tr>
<td>ALT+3</td>
<td>View next row in list when button is active.</td>
</tr>
<tr>
<td>ALT+4</td>
<td>View previous row in list when button is active.</td>
</tr>
</tbody>
</table>
